A heads up! Working with OP to resolve some issues with the list of actions that need to be included, so please ask your rule leads to keep an eye for changes related to:

Ex. 5 Deliberative Process (DP)

We'll adjust on the fly as OMB and EPA work to finalize everything, so if certain actions get yanked, we may need make corresponding updates to the Agenda/Plan entries.

Subject: DUE JULY 10: OCSPP Fall 2018 Reg Plan Agenda Data Call
Importance: High

DUE DATE: July 10, 2018
QUESTIONS/ISSUES? CONTACT: Angela Hofmann (564-0258)

Hi everyone,

OMB and OP have issued their Fall Reg Plan/Reg Agenda call a bit earlier than normal this year, and the deadlines are tight. Your immediate attention is required so that we can meet the tight deadlines. A rundown of what needs to be done follows - everything is due at the same time; i.e., complete all Tracker updates and send needed information to RCS by July 10th.

1. **ADP Tracker Updates for All Regulatory Plan entries and Agenda.** Unlike in years past, OP did not set separate deadlines for completing the update, review, and submission of Reg Plan and Reg Agenda entries in ADP TRACKER this time around. You must update your Plan and Agenda entries in ADP Tracker, distribute for review by the relevant staff-level OGC and OP workgroup members, then submit to RCS for review and approval by the OCSPP DAAs **not later than July 10th**. We will need the additional time to ensure DAA sign-off or otherwise accommodate revisions, and then complete all of the approvals in the system.

Don't forget: Reg Plan entries require additional information about need, legal basis, alternatives, anticipated costs & benefits, and risks.

The attached Excel spreadsheet from spring 2018 may be a useful reference as you review and submit your fall 2018 entries. Be please mindful of the following:

- Consider whether actions listed as "inactive" (or "pending" in ADP TRACKER) can be withdrawn.
 - Any action listed as "Long-Term" will have a projected next stage of 10/01/2019 or later.
 - Abstracts for any actions that are withdrawn should be revised to reflect the agency's decision to discontinue the action.
 - Abstracts of completed actions should reflect completion rather than projection.
 - There should not be any "Undetermined" responses for completed actions.
 - Actions that have a priority category "Economically significant" are almost always "Major" under CRA.
 - Actions that trigger UMRA > government typically also trigger federalism and some "government levels affected."
 - Spell out all acronyms other than "EPA," and use plain language in writing your abstracts.
2. **OMB significance determinations.** OP provided a list of anticipated FY19 final actions for signature, that includes the action's confirmed /absence of OMB determination, and spring 2018 EO 13771 designation (**See attached immediately below**). We need to give OP a list of actions that OCSPP is treating as "significant" to allow OP to process the determinations with OMB. We also need to update OMB

significance determination milestone dates for those action which we will be presenting rationales for non-significance determinations. **OPPT NOTE:** The Formaldehyde Technical Issues NPRM has a projected signature date in late August and requires an OMB determination for signature and publication in **FY18**. In addition, the final action stage milestones for the dust-lead hazard standards are presently in long-term and must be updated to be reflected in the Plan/Agenda.

3. **OCSPP's Reg Plan Statement of Priorities** (i.e., the Reg Plan Narrative). EPA's FY2017 Statement of Priorities, including OCSPP's narrative, is available at:
https://www.reginfo.gov/public/jsp/eAgenda/StaticContent/201710/Statement_2000.html.

4. **PROJECTED EO 13771 Cost Accounting for FY2019 Final Regulatory and Deregulatory Actions**. These are best-guess estimates your office has for any action with a final rulemaking stage that triggers EO 13771 as regulatory or deregulatory. **The attachment below provides more information.** The information needed includes:
 - Annualized costs or cost savings and/or the present value of those costs or cost savings using a 7% discount rate.
 - Currency year of the analysis (i.e. the dollar value year)
 - Length of time of the analysis over which these estimates are calculated

Please contact Angela or Melissa Chun if you have questions.

Best,
Peter
